

2022 上海大学外国专家项目

演讲人:

Prof. Jaebeom Lee (CNU, Korea)

Title: Chiroptical properties of FeSe Nanoparticles

专家简介:

Jaebeom Lee is an professor at the Chungnam National University, Daejeon, Korea. He has been studied in the field of nanochemistry, in particular, biosensor, self-assembly, and magnetoplasmonics. Various applications have been pursued to develop sensors and energy research.

讲座内容:

Current works on Fe-based nanoparticles, FeSe quantum dots, wires, plates will be introduced about their syntheses, opticap properties, biological applications.

讲座方式: Zoom 会议 (Address: <https://cnu-ac-kr.zoom.us/j/4306158567>)

讲座时间: Nov. 4, 2022 (Friday), 9:00 AM CST (China),
10:00 AM KST (Korea)
